

1. Construction & Demolition Waste Management Rules, 2016

Salient features of C&D Waste Management Rules, 2016 and its implication

Sl.No	Parameter	C&D Waste Management Rules, 2016	Implications
1	Application	The rules shall apply to everyone who generates construction and demolition waste such as building materials, debris, rubble waste resulting from construction, re-modelling, repair and demolition of any civil structure of individual or organisation or authority.	This will address the indiscriminate disposal of C& D Waste and enable channelization of the waste for reuse and recycling in gainful manner
2	Responsibility of Waste generators	1. Every waste generator shall be responsible for collection, segregation of concrete, soil and others and storage of construction and demolition waste generated separately, deposit at collection centre so made by the local body or handover it to the authorised processing facilities, ensure that there is no littering or deposition so as to prevent obstruction to the traffic or the public or drains.	Duties of waste generators, service providers would envisage people's participation in scientific management of C&D waste
		2. Waste generators who generate more than 20 tons or more in one day or 300 tons per project in a month shall submit waste management plan and get appropriate approvals from the local authority before starting construction or demolition or remodelling work, segregate the waste into four streams such as concrete, soil, steel, wood and plastics, bricks and mortar, keep the concerned authorities informed regarding the relevant activities from the planning stage to the implementation stage and this should be on project to project basis.	Segregation and channelizing the C&D waste will improve the other waste utilisation and management namely organic waste for composting, high calorific waste to energy recovery etc.
		3. Waste generators shall pay relevant charges for collection, transportation processing and disposal as notified by the concerned authorities	This will ensure Sustainability in the Waste Management System for C&D Waste

3	Responsibility of Service Providers and their Contractors:	The service providers shall prepare within six months from the date of notification of these rules, a comprehensive waste management plan covering segregation, storage, collection, reuse, recycling, transportation and disposal of construction and demolition waste generated within their jurisdiction. The service providers shall remove all construction and demolition waste in consultation with the concerned local authority on their own or through any agency.	The provisions have been introduced on the line of concept of Extended Producers Responsibility. Here, the service provider hired by waste generator has been made responsible for channelizing the waste generated by them in the public places to authorized C&D waste recycling facilities.
4.	Responsibility of local authority	Local Authority shall be responsible for proper management of construction and demolition waste within its jurisdiction including placing appropriate containers for collection of waste, removal at regular intervals, transportation to appropriate sites for processing and disposal. Local Authority shall seek detailed plan or undertaking as applicable, from generator of construction and demolition waste and sanction the waste management plan; seek assistance from concerned authorities for safe disposal of construction and demolition waste contaminated with industrial hazardous or toxic material or nuclear waste if any. Local Authority shall give appropriate incentives to generator for salvaging, processing And or recycling preferably in-situ. Local Authority shall establish a data base and update once in a year, device appropriate measures in consultation with expert institutions for management of construction and demolition waste generated including processing facility and for using the recycled products in the best possible manner.	This has been introduced to seek special attention of local bodies/ agencies responsible for waste management in the States. These provisions will put in place the Institutional framework for C& D waste management and strengthen system for waste management.

2. C&D Waste Management in GHMC

C&D waste generation: Hyderabad generates approximately 2,000 Metric Tonnes of C&D waste per day, primarily from demolition, construction and infrastructure development activities owing to rapid urbanisation.

C&D waste collection and transportation: GHMC has authorized the work of collection, transportation, processing of C&D waste to Ramky Enviro Engineers Limited. The facilities were set up under Public Private Partnership (PPP) on Build Operate Transfer (BOT) basis and operations are carried out under the name of "Hyderabad C&D Waste Private Limited".

All the vehicles used for transportation of C&D waste are equipped with a GPS to better monitor their movement and prevent illegal dumping. Unauthorized dumping of C&D waste attracts heavy penalties in Hyderabad.

C&D waste processing and disposal: Presently, GHMC has established two C&D recycling plants in PPP mode with a processing capacity of 500 Tonnes per day in two different directions in the city:

- a. Jeedimetla
- b. Fathullaguda

Both the processing plants use Wet Treatment Process (water washing & crushing) with Semi automated system to prevent dust pollution. The plants can process up to 500 TPD of C&D waste with a specialized segregation system, debris handling system, multiple screening systems, material washing, sand washing and water management system.

Various recycled products such as Recycled Aggregates (ranging from 8mm to 80 mm) and By Products (paver blocks, kerb stones, pre-cast walls) are generated at this facility which are utilized for non-structural purposes such as footpaths, road sub-base etc.

GHMC is also planning to establish two more recycling plants in the city to cover entire area and to decentralize C&D waste recycling.

3. Request Service

Citizens can reach out to GHMC helpline using toll-free number **18001201159** or raise a request through the **MyGHMC mobile application** to get their C&D waste lifted for which the Authority charge a **User Fee of INR 342 per tonne (subjected to revisions)**, which includes Collection, Transportation and Processing from the site to the recycling facility. Alternatively, Citizens can deposit their waste at Jeedimetla and Fathullaguda Processing facilities using their own transportation by paying Rs. 85.50/- per tonne (subjected to revision every year).

4. Penalties

As per G.O.Rt.No.632 and G.O.Rt.No.854, the government ordered the following penalties against unauthorized/dangerous transportation and dumping of C&D waste:

- a. First Offence – Penalty of INR 25,000 /- (Rupees twenty-five thousand only)
- b. Second Offence – Penalty of INR 50,000 /- (Rupees fifty thousand only)
- c. Third Offence – Penalty of INR 1,00,000/- (Rupees one lakh only) along with the confiscation of the vehicle used

Also, a penalty of INR 5,000 /- (Rupees five thousand only), in case of individual households other than slum areas and INR 25,000 /- (Rupees twenty-five thousand only), in case of bulk generators such as builders/work contractors/institutions/commercial establishments, etc. shall be levied for every offence on whose behalf the C&D waste is being transported/ dumped in an unauthorized/dangerous manner. The GHMC, HMDA, RTA & Traffic Police Department shall enforce these penalties along with their regular enforcement activities.

5. Help and Support

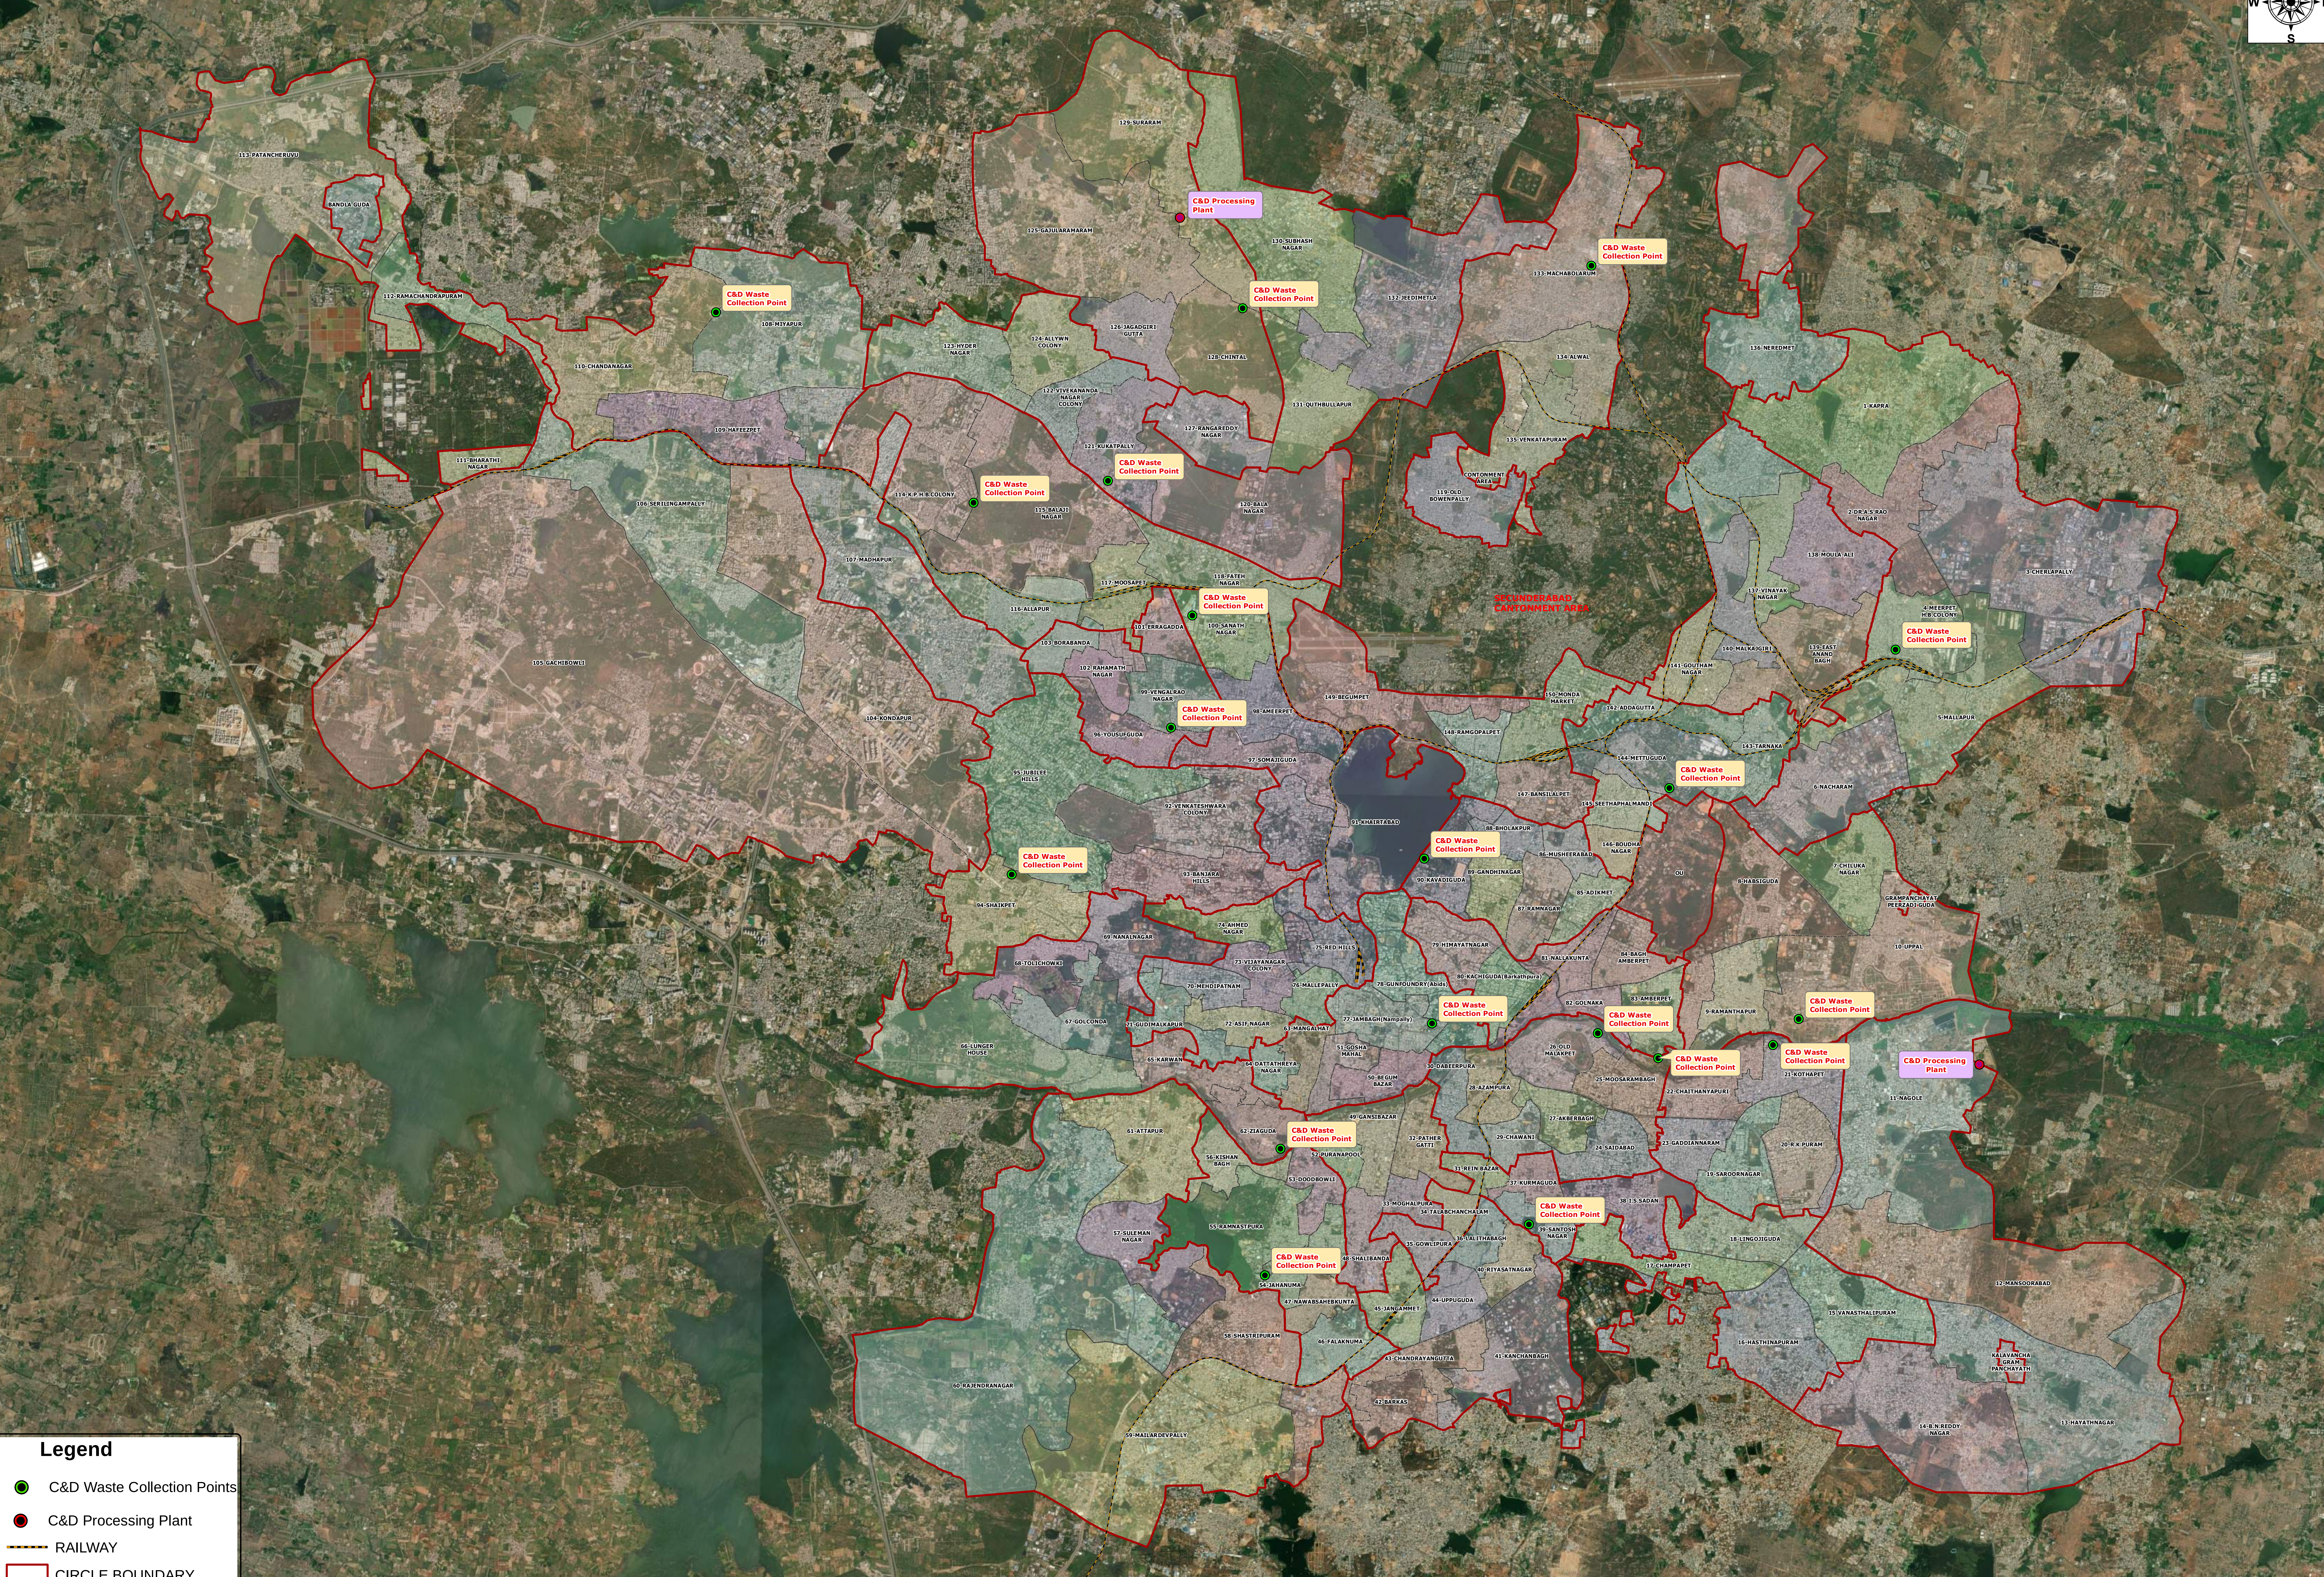

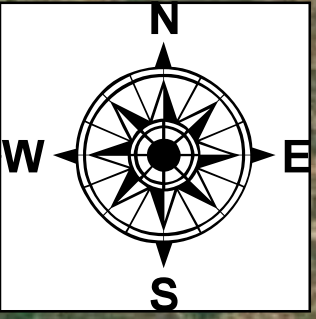

In case of any further clarification required please reach out to the following concerned personnel.
